Paint Change: 8-Frame to 68-Frame

Crankcase, Rear Cover, Bearing Cover and Shaft Protector Color and Finish Change

Cat Pumps is implementing a change to the paint finish on 8-frame to 68-frame pumps, from the original blue hammer tone paint to a two-coating blue epoxy paint. Cat Pumps has selected this blue epoxy paint finish for the crankcase, rear cover, and bearing cover, and for the 60 and 68-frame shaft protector. This change will continue as inventory of existing products is exhausted.

The two coating blue epoxy finish offers superior corrosion resistance for certain industrial applications where the 8-frame and larger pumps are often applied.

Please note: there will be no model or part number changes as a result of this update.
